WORK EXPERIENCE

Associate Software Engineer | Domenix, Chantilly VA

May 2023 - Present

- Led a team of interns in the development of a non-profit job search website, consistently driving project milestones and deadlines.
 - Managed daily scrum meetings with the development team, fostering collaboration, and addressing roadblocks.
 - Developed and maintained web applications using Javascript, React, and MongoDB, contributing to the site's robust functionality and user experience.
 - Collaborated with stakeholders and users, gathering requirements, providing updates and ensuring alignment with project goals.
 - Conducted regular backups of critical systems and data in our server room, enhancing data security and recovery capabilities.
 - Proficient in setting up and installing various operating systems, including Ubuntu, Windows, and other Linux distributions, on a diverse range of hardware platforms.
 - Skilled in creating bootable USB drives for operating system installations using tools such as Rufus, ensuring efficient and reliable installation processes.
 - Experience with troubleshooting servers and setting up local instances on personal pc's.
-

PROJECTS

Software Developer, Jobs4Interns | Website | 2023

Designed to connect students looking for internships with businesses hiring.

- Designed and developed a responsive website using MongoDB, React, Javascript, and Express.js.
- Implemented and integrated reusable React components, enhancing code modularity and streamlining development processes in the web application.

Software Developer, W Word | IOS Application (in progress) | 2024

Designed to foster users' vocabulary enrichment and language learning experiences.

- Designed and built a user-friendly interface with Swift and XCode, enhancing user experience and engagement.
 - Integrated features such as user account creation, word saving, sharing, and a calendar view of previous words, increasing the app's functionality and user retention.
 - Engaged in interactive development cycles, gathering user feedback and refining features to meet evolving user expectations and industry standards.
-
